

Reliance Delivers the Latest Lagoon 620

Reliance Yacht Management is pleased to have completed the delivery of the latest Lagoon 620 from the factory in Bordeaux to the Hamble. In response to a short notice request from the UK dealer, Ancasta we were able to reschedule captains and crew and provide the best captain for the job. Captain Steve Dewhurst, a specialist catamaran skipper who has sailed an earlier L620 across the Atlantic to the Miami Boat Show, was flown from Spain to lead the delivery crew.

Because of the Captain's extensive experience he was able to complete the necessary checks and QC report efficiently and minimise the the time before departure. With a brief stopover in Brittany to wait for the tide, the delivery went smoothly and without problems.

The client was kept up to date at all times of the progress. A tracking system was employed that allowed them to follow the delivery on line. One benefit of this was the ability to establish an accurate ETA and ensure that a suitable berth was made available for their arrival.

"A L620 is not a boat I would give to any delivery skipper. I needed to see relevant and appropriate experience. Reliance were a joy to deal with. Communication was excellent at all stages . Our representative on board said the skipper was very thorough and the whole process was dealt with in a professional and flexible manner."

Simon Miles, Ancasta

Reliance has become the leading yacht delivery and logistics company with many of the world's top dealers, manufacturers and charter operators utilising their services to enhance their own performance and efficiency.
