

PRESS RELEASE

January 2010

Reliance Offers New Spot Hug

Reliance Yacht Management offers the latest method of remote monitoring from Spot.

When you are away from your boat, ensure it remains safe. Using state-of-the-art satellite technology, SPOT HUG monitors a virtual security perimeter around your boat. SPOT HUG will instantly alert the appropriate parties even from remote areas beyond cellular coverage.

UNAUTHORIZED MOVEMENT NOTIFICATION

By establishing a virtual security perimeter around your boat, SPOT HUG detects Unauthorized Movement when your boat moves more than 500 meters without your authority and the key FOB is not present. A notification with the GPS position is automatically sent to the Asset Monitoring Center who alert local authorities (where available).

SENSOR ALERT CAPABILITIES

Connect SPOT HUG to up to 4 monitoring sensors for battery, high water, engine/ignition or other external contacts. SPOT HUG will alert you via SMS and/or email when an event happens. (Additional service required).

FULL SPOT MESSAGING FUNCTIONALITY

Provides reliable, location-based messaging via satellite independent of VHF radio. Let loved ones know where you are and that you're OK or send a message for help in an emergency. Includes functionality for Check-in/OK, SOS, Help and Track Progress.

End.
