

Dedicated International Yacht Tracking Website Launches – Yachttrackers.com

By Reliance Yacht Management

Dated: Feb 11, 2011

Yachttrackers.com is an exciting new online ecommerce site website providing essential equipment and advice for monitor the security, performance and whereabouts of vessels

Yachttrackers.com unveiled a new online niche, focusing solely on the international tracking of yachts around the world. Managing Director Nick Irving says, "There's no doubt that the global security and financial crisis has impacted many yacht owners and fleet managers who need the peace of mind and the ability to efficiently manage their assets. As the international commerce continues to remain essential for professional yacht charters and the concern for security in many parts of the world finding more effective alternatives to remotely monitor the performance and location of a yacht becomes a valuable tool

The website aims to provide yacht owners, charter fleet operators and yacht builders with everything needed to provide the hardware and support to meet their requirements

There is a variety of methods and hardware available but all require the use of satellites to gain a position report and communicate that data. Using the satellite tracking system is ideal for getting the latest information about the progress of your yacht. Using a secure password protect area dedicated to the delivery of your yacht you can get the latest information on the position of your yacht. The information of your vessels position, speed and heading is transmitted back to the server. The information is then converted into a simple visual format and displayed on electronic charts. All you need is any computer with internet access to connect and be able to view past voyages as well as the actual (live) position of your yacht.

Yachttrackers.com aims to become the single largest portal focusing purely on tracking systems for the leisure yacht market.
